 Unknown Availability 		

SNFs can set their daily status and update throughout the day with an easy-to-use response system indicating:

- **Full Availability:** Accepting all patient referrals
- **Limited Availability:** Accepting referrals but only for certain patients
- **No Availability:** Not accepting any new patient referrals

Below is an actual weekly summary of SNF availability in the referral catchment area of a 5-hospital health system using Repisodic. By viewing and responding to the data in real time, the health system has been able to consistently maintain availability visibility for over 80% of SNFs across their entire referral catchment area.

## SNF Availability Responses

## Summary Insights

- 1,000+ availability prompts sent every week
- 85% response rate in health system referral catchment area
- 91% of partner network SNFs are actively responding daily
- **Over 3/4 of all SNFs in this area have beds available for this health system's patients on any given day**
